ORDER :

During the period from 01.06.2023 to 30.09.2023 of South West Monsoon the cumulative average rainfall received in the State is 487.2 mm as against the Normal of 574.7 mm which shows deviation of (-) 15.2 %.

2. As per the revised Manual for Drought Management – 2016, the proposals for declaration of Drought Mandals should be examined with reference to the following guidelines for Drought Kharif and the District Collectors sent specific reports to the Government, taking Mandal as unit:

Season Drought (Kharif): Season drought for Kharif 2023 may be considered during the month of June, July, August and September by taking into consideration of Mandatory and Impact Indicators.

Step: 1

Mandatory Indicators, Viz. Rainfall deviation or SPI with Dry Spell will be considered as per Matrix shown below to assess if the first drought trigger is set off.

Matrix for rainfall deviation and dry spells (Trigger -1)

RF deviation / SPI	Dry Spell	Drought Trigger
Deficit or Scanty RF/SPI <-1	Yes	Yes
Deficit or Scanty RF/SPI <-1	No	Yes, if rainfall is scanty or SPI<-1.5, else No
Normal RF/SPI >-1	Yes	Yes
Normal RF/SPI >-1	No	No

Step: 2

In the event that the first drought trigger is set off in Step 1, the impact indicators will be examined as per the following matrix:

Matrix for impact indicators (Trigger 2)

(PTO)

::2::

Mandatory Indicator		Impact Indicators				Category of Drought
Rainfall Indices		Agriculture	Remote Sensing	Soil Moisture	Hydrology	
Rainfall Deviation or SPI	Dry Spell	Crop Area Sown	VCI or NDVI or NDWI deviations	PASM/MAI	SFI/RSI/GWDI	

It may consider any three out of four types of the impact indicators (one from each) for assessment of drought.

Explanation:

The intensity of the drought will be contingent upon the values of at least three out of four impact indicators Viz. Agriculture, Remote Sensing, Soil Moisture and Hydrology in the following manner.

- Severe Drought: If at least two of the selected 3 impact indicators are in 'Severe' category and one is in 'Moderate' category.
- Moderate Drought: If at least two of the selected 3 impact indicators are in 'Moderate' category.
- Normal: for all other cases.
- Trigger 2 will be set off in the event of a finding of Severe or Moderate drought.
- The State has an option to reduce the drought category by one rank (i.e. Severe to Moderate) if the irrigation percentage of the administrative region (District/Taluk/Block/Mandal) for which drought is being declared is more than 75%.
- However, in such a situation of reduction of drought intensity from 'Moderate' to 'Normal', the State Government will still be required to conduct field verification as prescribed in Step 3 below.

Step:3

In the event that Trigger 2 is set off, the district level officials concern have to conduct sample survey for Ground Truthing. The finding of field verification exercise will be the final basis for judging the intensity of drought as Severe or Moderate.

3. A meeting of the Committee on Drought constituted vide G.O 1st read above to scrutinize the proposals submitted by the District Collectors for declaration of Drought affected Mandals held on 25.10.2023, the Committee have examined in detail the proposals received from the District Collectors of Srikakulam, Vizianagaram, Parvathipuram Manyam, Alluri Sitharamaraju, Visakhapatnam, Anakapalli, Kakinada, Dr.B.R.Ambedkar Konaseema, East Godavari, West Godavari, Eluru, NTR, Krishna, Guntur, Bapatla, Palnadu, Prakasam, SPSR Nellore, Kurnool, Nandyal, Ananthapuramu, Sri Satya Sai, YSR, Annamayya, Chittoor and Tirupati for declaration of Drought affected Mandals in Kharif - 2023 with reference to the guidelines prescribed by Government of India revised manual for Drought Management-2016 and also recommended to the Government that 103 Mandals as Drought affected – 80 mandals categorized as Severe Drought and 23 Mandal as Moderate Drought - in Seven (7) Districts i.e. NTR, Nandyal, Sri Satya Sai, Annamayya, Kurnool, Chittoor and Ananthapuramu.
